

The Ten Reasons You Need A **PV**BX System

Virtual Media Cart

Play and control tapes and or DVDs in a classroom without a player, media or remote control.

Security

Monitor students and reduce misconduct, vandalism and theft.

Broadcast Announcements

Monday morning, the principal can make an announcement to all classrooms.

Video Contact

Don't just talk, have a real-time video conversation with staff member.

Control TV Access

Restrict TV access by time, channel, and location.

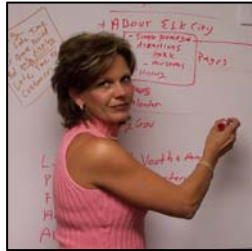

School Bulletin Board

Display school events, lunch menus or a calendar of events to any TV on campus.

Emergency Mode

The superintendent, principal, medical and security staff can react faster. Their TVs show the classroom emergency.

Remote Teaching

Teach a class to multiple classrooms simultaneously, or connect your classroom to your existing distance learning lab.

Off Campus Monitoring

View cameras and control devices remotely via the Internet.

E-Rate Eligible

The PBVX switch is an E-Rate item for this years funding. Get up to 90% off this E-Rate eligible service.

For more information visit www.pvbxswitch.com or call for a live demonstration.

A **PVBX*** or **Private Video Branch eXchange** is a video PBX or switch. A PVBX links classrooms and offices through a switch matrix. Cameras, monitors, DVD players and other video devices can all be interconnected.

The PVBX switch is controlled by web based software. Any Internet capable computer can control the switch. It's very simple and intuitive to use. Switches can be sized for small schools to large campuses. Available sizes are 32, 48, 96, or 128 connections.

Security is built in, to limit who, how and when the switch can be controlled. There are seven ways the switch can be used in a school environment. Any or all of the modes can happen simultaneously.

What every school wants.

PVBX

Imagine a teacher being able to chat with the principal, watch children in the playground, or view and control a movie without leaving the classroom.
